

Secure your wood supply with VAARA

Sustainable, Certified High Quality wood
solutions from Finland

VAARA offers premium Nordic wood solutions, engineered for the demands of modern construction. From non-settling logs to stylish cladding panels, our products combine sustainability, durability, and design. Build with VAARA — crafted for a better tomorrow.

About VAARA

Roots in Sustainability

Your Trusted Partner for Certified Nordic Wood Solutions

For over 90 years, VAARA has been crafting high-quality timber products in the heart of Finland. Our expertise spans four generations, combining traditional craftsmanship with cutting-edge technology. Every product is sourced from sustainably managed, certified Nordic forests and refined in our advanced facilities. Today, VAARA is a trusted partner for builders and architects in 14 countries.

Vaara Mills are surrounded by vast, sustainably managed forest resources, guaranteeing reliable deliveries to customers worldwide.

The VAARA mill latest expansion was completed in 2021.

Lapland Central Hospital featuring VAARA Nordic™ fire-retardant exterior cladding.

VAARA Stabil™

Build Faster, Smarter, Greener

Stable, Durable, & Ready for the Future

VAARA Stabil™ is not just a log—it's a revolution in timber construction. Our non-settling CLT logs are engineered for stability, ensuring no shrinking or settling over time. Perfect for hybrid designs combining wood, glass, or stone, VAARA Stabil™ CLT logs offer architects unlimited freedom to innovate. With exceptional energy efficiency and a sleek finish, VAARA Stabil™ ensures long-lasting value.

Key Benefits:

Non-settling structure eliminates maintenance.

Superior thermal insulation reduces energy costs.

Versatile applications for modern and traditional styles.

Multi-story building in Kuusamo, Finland

VAARA Stabil™ is the perfect choice for projects of any size. From cozy urban homes to modern holiday retreats or multi-story buildings, VAARA Stabil™ delivers sustainable performance and lasting reliability for architects and builders.

VAARA Nordic™ Exterior Cladding panels Elevating Exterior Design

Timeless Nordic Elegance

VAARA Nordic™ exterior panels elevate the aesthetic and functionality of any facade. With widths available up to 277 mm, these panels offer an expansive, bold profile that can seamlessly integrate into both modern and traditional designs. Crafted from premium Nordic spruce or pine, VAARA Nordic™ panels withstand harsh weather, offering both a stylish appearance and robust protection for your building, ensuring long-lasting durability.

Designed for ease, VAARA Nordic™ Exterior Cladding panels come with high-quality pre-finished surfaces, making installation quick and efficient. The panels are available in a range of custom colors and can be further enhanced with fire-retardant treatments for added safety, making them ideal for both residential and commercial applications.

Whether you are seeking a modern, sleek appearance or a more traditional look, VAARA Nordic™ offers flexibility with profiles and sizes to suit any design vision. Combining sustainability, style, and easy installation, VAARA Nordic™ Exterior Cladding panels is the perfect choice for a variety of building projects.

Key Benefits:

Wide profiles for a modern aesthetic.

Pre-painted options for quick installation.

Weatherproof and UV-resistant finishes.

Sustainability From Forest to Architecture

Building a Sustainable Future

At VAARA, sustainability is more than a commitment — it's a way of life. Our products are PEFC- and FSC-certified, guaranteeing that every log and panel comes from responsibly managed certified forests. By choosing VAARA, you reduce your environmental footprint while contributing to eco-friendly building practices. From tree planting to product delivery, we ensure every step supports a greener future.
